

Medical Intuitive Introduction

August 27th, 2017

Wendie is an excellent speaker! She talked about Meta-Sensory Skills - those skills behind the five senses of sight, hearing touch, smell and taste; very informative. It was also a treat when Wendie guided the group through an experiential meditation to learn the skill of talking to a personal body part to gather information for healing. Wendie is passionate about her mission to support the allopathic field of medicine with intuitive insights and thinks that every hospital should have a Medical Intuitive on staff. We were very blessed to have her at our SDRC Gathering.

Wendie has yearly Medical Intuitive classes in San Diego that start in September and January.

Thank you Wendie!!
